Polycarbonate Sheets

Polycarbonate Sheets

Polycarbonate is a polymer with a unique blend of desirable properties. This polymer can be given shape by different processes, which include injection moulding, blow moulding, extrusion and thermoforming. Polycarbonate roof sheets are manufactured by the process of extrusion. Polycarbonate roof sheets are commonly called transparent steel due to their wonderful impact resistance and glass like clarity.

Polycarbonate sheets are made of polycarbonate polymers which are durable, high impact resistant, low scratch resistant and heat resistant. We provide Polycarbonate sheet for natural light in matching profiles of metal roof sheets. Polycarbonate sheets are UV coated which increase life span of sheet, Its available in clear & embossed form which protect the worker from direct sunlight, it also provide equal distribution of light

APPLICATIONS

- ◆ Household Cladding
- ◆ Agricultural Units
- ◆ Warehouses
- ◆ Industrial Roofing
